

Systematic Screening in the COVID-19 era

Considerations

Continue screening and engage in professional learning opportunities.

Continue to screen and stay up to date as researchers learn more about screening in remote and hybrid instructional experiences.

Use multiple sources of data to inform instruction.

Use behavior screenings, academic measures, attendance, nurse visits, and counseling referrals. Monitor fidelity of Tier 1 practice.

Screen responsibly.

It is critical to consider the additional risk with parent and student reports and to respond to concerns in a timely manner.

Guidelines

all students

3 x year

Teacher-
completed

Fall - Winter - Spring
