

## SRSS-IE Coordinator Script for Training Staff

This document provides support to the SRSS-IE Coordinator in training staff prior to scoring students on the SRSS-IE

**Author:** Michigan's Integrated Behavior and Learning Support Initiative (MIBLSI)

**Version:** 1.0

**Date:** December 2019

### What is the SRSS-IE?

- The Student Risk Screening Scale – Internalizing and Externalizing is a universal behavior screener
- It identifies levels of risk for students in the categories of internalizing behavior and externalizing behavior with high validity
- Schools across the country use this tool in order to identify students early who may need support beyond Tier 1
- The SRSS-IE is completed 3 times per year (fall, winter, spring) and only takes about 10-15 minutes to score the entire class

### How do I complete the scoring?

- Rate each student one at a time, scoring *across* the row
- The items are not defined and are up to individual interpretation
- Score the student based on your experience and please do not discuss students with other staff during the scoring
- Remember, these items are not intended to be a description of the student, but of a behavior observed

### What will happen with the data gathered?

- Scores will be calculated to identify whether a student is at low, moderate, or high risk

- The SRSS-IE scores, along with other data sources, can be used:
  - To plan for school-level supports
  - By grade-level teams to inform instructional strategies
  - To inform classroom interventions
  - To identify whether a student may need a behavioral intervention, such as Check-In Check-Out
- Scores are kept confidential, just like any other universal screener

Michigan's Integrated Behavior and Learning Support Initiative (MIBLSI) is a Grant Funded Initiative (GFI) funded under the *Individuals with Disabilities Education Act* (IDEA) through the Michigan Department of Education.
