

ACTIVE SUPERVISION

IN A VIRTUAL LEARNING ENVIRONMENT

Watch a brief introduction and check out the updated video for virtual learning environments!

1 Examine data and identify a time during virtual instruction that would most benefit from active supervision.

2 Ensure the routine for the target activity is familiar and understood by students. If not, routines and expectations must be established.

3 Provide the cue or prompt to begin the activity.

4 As the activity unfolds, scan across the video feed of each student and monitor their video and/ or text responses for signs of engagement or disengagement.

5 Signal your awareness of students' actions through virtual presence using a video feed, verbal acknowledgements, chat communications, and prompting as needed.

6 Manage infractions and off-task behavior efficiently, privately, and discretely. Continue to provide opportunities for positive interactions.

7 Reinforce students' desired behavior with verbal praise, gestures, and virtual reactions.

8 Provide students with an opportunity to give feedback, such as using poll features.
