

Reflect

Reflect on implementation of Tier 1 practices before connecting students to Tier 2 or Tier 3 supports

Steps to reflect...

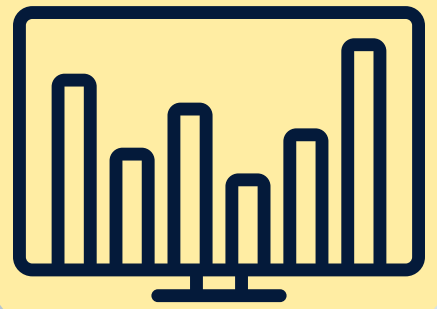

Review Tier 1 data. Consider: Are procedures for teaching and reinforcing in place? Have relevant Tier 1 lessons from academic and social curricula been taught with fidelity? Have school-wide behavior expectations been taught?

Address Tier 1 concerns. For example, implement procedures for teaching and reinforcing with fidelity, increase use of low-intensity strategies, and teach or re-teach relevant lessons.

Connect students to supports. Interpret data to determine if students might benefit from Tier 2 or Tier 3 interventions using intervention grids.

Contact families. Communicate with families before beginning a Tier 2 or Tier 3 intervention.
