First time module users for 2024-2025 [view informational letter and register here!](#)

If you would like to share your thoughts about factors related to usage (e.g., acceptability, feasibility) of Ci3T professional learning experiences and resources you engage with, we invite you to complete the [Ci3T Usage Rating Profile](#).

# Agenda

1. Welcome & Introductions
2. Overview of Comprehensive, Integrated, Three-tiered (Ci3T) Models of Prevention
3. Systematic Screening: Tools & Logistics
4. Using Systematic Screening to
  1. Inform Instruction at Tier 1
  2. Empower Educators with Low-Intensity Strategies
  3. Connect Students to Tier 2 and Tier 3 Interventions
5. Wrapping Up and Moving Forward

**With sincere  
gratitude**

**What are ALL students accessing?**

# Ci3T Primary Plan: Procedures for Teaching

# Ci3T Primary Plan: Procedures for Reinforcing

# Ci3T Primary Plan: Procedures for Monitoring

Area I: Academics Responsibilities	Area II: Behavior Responsibilities	Area III: Social Skills Responsibilities
<b>Faculty and Staff:</b> Teach core programs according to district and state standards with fidelity.	<b>Faculty and Staff:</b> Implement the Positive Behavior Support Plan.	<b>Faculty and Staff:</b> Implement the Social Skills Instruction Plan.
Examples: • Differentiate instruction to meet the needs of all students. • Provide meaningful and appropriate practice opportunities. • Provide feedback in a timely manner to students and parents. • Conduct, report, and use data.	Examples: • Demonstrate positive attitude. • Use a positive response to initial indicators of not meeting expectations: ○ Praise students meeting expectations ○ Redirect students who are struggling ○ Reteach expectations ○ Allow student time to respond to request and re-engage.	Examples: • One 20 min lesson per week teacher lead • One 30 min lesson every other week co-taught by teacher and counselor • Grades 3 – 5 • One 20 min lesson per week teacher lead • One 45 min lesson every other week co-taught by teacher and counselor (See appendix for specific lessons for each grade level)

*Note.* We do not endorse any specific curriculum or program. We encourage Ci3T Leadership Teams and District Decision Makers to review current evidence to inform their decision making.

Ci3T Implementation Report 2025-2026  
Fall 2025  
Implementing a Comprehensive, Integrated, Three-Tiered Model of Prevention

Prepared by:  
Lincoln Elementary Ci3T Leadership Team

# Comprehensive, Integrated, Three-Tiered Model of Prevention

(Lane, Kalberg, & Menzies, 2009)

# Essential Components of Primary (Tier 1) Prevention Efforts

## Social Validity

## Treatment Integrity

### Treatment Integrity & Social Validity

**Treatment Integrity:** the degree to which practices are put in place as planned.

**Social validity:** the degree to which stakeholders find goals of a practice socially significant, the procedures acceptable, and the outcomes socially important.

Get a snapshot of implementation

Why collect these data?

Use to inform decision-making

What are the benefits?

Celebrate the work

Give faculty and staff a voice

Identify area for growth

How do we use the data?

Inform professional learning

Check access to Tier 1

Develop and maintain the foundation

## Systematic Universal Screening

Academic Behavior

# Comprehensive, Integrated, Three-Tiered Model of Prevention

(Lane, Kalberg, & Menzies, 2009)

## Secondary (Tier 2) Intervention Grid

Secondary (Tier 2) Interventions				
Support	Description	Schoolwide Data: Entry Criteria	Data to Monitor Progress:	Exit Criteria
<b>Self-Regulated Strategy Development (SRSD) for Writing</b>	Students engage in small group strategic intervention focusing on specific writing instruction (e.g., story writing, persuasive writing) using the Self-Regulated Strategies Development approach to help students plan and write. Identified students meet 3-4 days/week for 30-min lessons over 3-6 week period (10-15 lessons).	One of more of the following: <b>Academic:</b> <input type="checkbox"/> AIMSweb: intensive or strategic level (written expression) <input type="checkbox"/> Two or more missing writing assignments within a grading period	<b>Student measures</b> Weekly writing probes scored on quality, total words written, number of writing elements, and correct writing sequences <b>AND</b> Work completion <b>Treatment integrity</b> Treatment integrity checklist <b>Social validity</b> Teacher: IRP-15 Student: CIRP	<input type="checkbox"/> Completion of intervention curriculum. Writing goals for increased gains in quality, number of total words written, writing elements, and correct writing sequence. <b>AND</b> <input type="checkbox"/> Passing grade on progress report or report card in writing or the academic area of concern <b>AND/OR</b> <input type="checkbox"/> Zero missing assignments in a grading period
<b>Behavior Education Program (BEP) / Check-In, Check-Out (CICO)</b>	Participating students check in and out with a mentor each day on targeted goals. During check-in, students receive a daily progress report that they take to each class for feedback on their progress meeting the school-wide Ci3T model expectations. Teachers complete the daily progress report and it is reviewed by the mentor and student together at the end of each day. Progress is monitored and shared with parents.	<b>Behavior:</b> <input type="checkbox"/> SRSS-E7: Moderate (4-8) <input type="checkbox"/> SRSS-15: Moderate (2-3) <input type="checkbox"/> SRSS-E7: High (9-21) <input type="checkbox"/> SRSS-15: High (4-15) <input type="checkbox"/> 2 or more office discipline referrals (ODR) in a 5-week period <b>AND/OR</b> <b>Academic:</b> <input type="checkbox"/> Progress report: 1 or more course failures <input type="checkbox"/> Progress report: Targeted for Growth for academic learning behaviors	<b>Student measures</b> Daily progress reports <b>Treatment integrity</b> Coach completes checklist of all BEP steps and whether they were completed each day (percentage of completion computed) <b>Social validity</b> Teacher: IRP-15 Student: CIRP	<input type="checkbox"/> SRSS-E7 score: Low (0-3) <input type="checkbox"/> SRSS-15 score: Low (0-1) <input type="checkbox"/> With 8 weeks of data, student has made their CICO goal 90% of the time and there have not been any office discipline referrals. The teacher is then contacted for their opinion about if exiting is appropriate or if CICO should continue.
<b>Behavior-specific praise</b>	Behavior-specific praise (BSP) refers to sincere praise statements that acknowledge the student and reference the specific, desirable behavior being recognized, praising effort (not ability). BSP is most	<b>Behavior:</b> <input type="checkbox"/> SRSS-E7: Moderate (4-8) <input type="checkbox"/> SRSS-15: Moderate (2-3) <input type="checkbox"/> SRSS-E7: High (9-21) <input type="checkbox"/> SRSS-15: High (4-15) <input type="checkbox"/> 2 or more ODRs within a grading period <b>AND/OR</b>	<b>Student measures</b> Student behavior targeted for improvement (e.g., academic engaged time % of intervals, assignment completion, ODRs)	<input type="checkbox"/> 0-1 ODRs in a grading period <b>AND</b> <input type="checkbox"/> Zero missing assignments in a grading period <b>AND</b> <input type="checkbox"/> SRSS-E7: Low (0-3) <input type="checkbox"/> SRSS-15: Low (0-1)

**Tier 3**  
Tertiary Prevention (≈5%)

## Tertiary Intervention

Support	Description	School-wide Data: Entry Criteria	Data to Monitor Progress:	Exit Criteria
<b>Functional Assessment-Based Intervention</b>	A functional assessment is completed to develop an individualized intervention plan. Functional assessment: review of student records; interviews: teacher, parent, student; and direct observation of the target behavior; SSIS Rating System. Functional assessment information is placed in the function matrix (Umbreit, Ferro, Liaupsin, & Lane, 2007). The Decision Model (Umbreit et al., 2007) is used to determine the method of the intervention. Intervention components: (A) antecedent adjustments, (R) reinforcement, and (E) extinction.	Academic: Progress Report with 2 or more areas of concern OR Below grade level in reading or math AND Behavior: -More than six office discipline referrals in the previous school year AND/ OR -SRSS-IE High Risk	Student measures: Data on target and/or replacement behaviors are collected daily. Treatment integrity: Treatment integrity is assessed and data are graphed to determine effect of the intervention. Component checklist for A-R-E intervention tactics completed daily with 25% of sessions observed by another educator. Social validity: Pre- and post-surveys: teacher (IRP-15) and student (CIRP)	The behavioral objective is established based on current levels of performance and expected levels of behavior. Students exit support when goals are achieved and maintained for three consecutive data points. Maintenance data are collected to ensure behavior maintains without intervention.
<b>Lindamood Phoneme Sequencing®</b>	Individual instruction with reading specialist; 30 min per day; 5 days per week. Direct instruction in decoding and blending; sight words, use of context clues. Computer supported practice. Addressing reading outcomes: alphabets and reading fluency.	Academic: reading with proficiency at 2 or more grade levels below or trajectory stable with Tier 2 intervention Behavior (consider) -SRSS-IE Moderate or High Risk on screening OR -Two or more office discipline referrals, indicating concerns with peer interactions	Student measures: AIMSweb Reading CBM, weekly progress toward end of year grade level target Treatment integrity: Daily checklist completed by reading specialist, observed by teaching assistant periodically Social validity: Student and teacher-completed surveys	Reading on grade level or making progress as to predict meeting end of year grade level proficiency on AIMSweb reading probes. Monitor progress bi-weekly once exited.

### Abstract

Given the need for a swift, systematic way to identify students with internalizing and externalizing behavior patterns to connect these students with appropriate supports, we present new findings of the Student Risk Screening Scale–Internalizing and Externalizing (SRSS-IE). In this article, we examined (a) factor structure of the SRSS-IE and (b) the extent to which measurement invariance holds across gender, special education status, race, and ethnicity, as well as time point (fall, winter, spring) within each school level (elementary, middle, high). The sample includes 124 schools from four U.S. geographic regions in their first year of implementing the SRSS-IE collected over a 10-year span. Using confirmatory factor analysis procedures accounting for the nesting of students within teachers' classrooms, we confirmed a two-factor structure (internalizing and externalizing) and determined three items may be removed from the instrument while maintaining adequate model fit, pending replication with schools in later stages of screening implementation. All model comparisons between configural, metric, scalar, and strict models met invariance criteria within a time point. Longitudinal models also met these invariance criteria. We discuss educational implications, limitations, and directions for future research.

### Keywords

universal behavioral screening, psychometric properties

Throughout the United States, federal, state, and local educational leaders have placed a high priority on developing integrated tiered systems of support such as comprehensive, integrated, three-tiered (C3T) models of prevention to assist educators in meeting students' academic, behavioral, and social and emotional well-being learning needs (Lane, Buckman, et al., 2020; McIntosh & Goodman, 2016). Having moved beyond "wait-to-fail" models (Sugai & Horner, 2002), leaders are embracing systemic structures for prevention and search-and-serve mandates (IDEA, 2004). Integrated tiered systems offer an array of evidence-based strategies, practices, and programs at each level of prevention: Tier 1 for all, Tier 2 for some, and Tier 3 for a few students (Lane, Cook, & Tankersley, 2013). Tiered systems provide a structure for guiding educators to achieve their goals of (a) preventing the development of learning and behavior challenges and (b) responding effectively and efficiently when such challenges do arise (Lane, Oakes, Cantwell, Royer, et al., 2019). A keystone feature of tiered systems is data-informed decision-making, with

academic and behavior systematic screening data used in tandem with other student performance data (e.g., office discipline referrals [ODRs], nurse visits, attendance) to detect students for whom Tier 1 prevention efforts—even when implemented with integrity—are insufficient to meet their multiple needs (Buckman et al., 2021; Oakes et al., 2014).

Tiered systems may hold particular benefit for students with and at risk for emotional and behavioral disorders (EBD; Lane, Buckman, et al., 2020). Students with EBD are those who experience externalizing (e.g., aggression,

Interventions & Supports

May 03, 2021

## Selecting a Universal Behavior Screening Tool: Questions to Consider

In any tiered system, it is important for implementers to have reliable data to detect students for whom Tier 1 supports alone are insufficient and may benefit from Tier 2 or Tier 3 interventions and supports. Systematic screening is a proactive, reliable method for examining overall levels of student performance in a district, school, department, grade level, or class as well as one component of a process to connect students to more intensive supports. As with academic screening tools, universal behavior screening tools can provide reliable, valid data to detect initial signs of internalizing (e.g., extremely shy, anxious, and withdrawn) and externalizing (e.g., defiant, disruptive, and aggressive) behaviors before they may become chronic challenges for the student, potentially negatively impacting their social and emotional well-being. In this brief, we provide considerations for selecting a universal behavior screening tool to inform instruction for all students by providing teachers with reliable, valid data that can be analyzed along with other sources of data (e.g., attendance, nurse visits, office discipline referrals) to inform instruction. For educational leaders interested in adding a behavior screening tool to their regular school practices, we offer considerations when answering the question: Which universal behavior screening tool shall we adopt?

For educators interested in selecting a systematic screening tool, it is beneficial to first consider your school or district specific priorities relative to systematic screening, and what resources are available for investment. Taking stock at the beginning of this process allows you to set priorities and create a feasible plan for selecting a tool that will meet the needs of your school or district. As you read this practice brief, consider the [Systematic Screening Tools: Universal Behavior Screeners](#) listing of examples of currently available screening tools. In this practice brief, we offer five questions for you to consider as you decide which systematic screening tool to adopt, install, and sustain. These questions are intended to support you to identify your available resources and your screening needs.

1. Student groups
 

What grade-levels of students will you be supporting with systematic screening (e.g., preschool, elementary, middle, and/or high school)?

Many systematic screening tools are available, with each being designed and evaluated for use with specific grade levels. Therefore, beginning your considerations by identifying the grade levels for which you plan to screen is an important first step. If you plan to screen students across a wide range of grade-levels (e.g., kindergarten through twelfth-grade), you might consider adopting a single screening tool validated for use across all grade spans. However, given fewer systematic screening tools are validated for use at the high school level, it might be necessary to use different screening tools for different grade spans (e.g., one screening tool for the elementary level and another for the middle and high school levels). When reviewing tools, be certain students are screened only using tools designed and evaluated for that

## Tips for Communicating with Your Community about Systematic Screening: What does your district and school leadership team need to know?

Rebecca Sherod, University of Kansas, Wendy Peia Oakes, Arizona State University, Katie Scarlett Lane, Vanderbilt University, and Kathleen Lynne Lane, University of Kansas

Share information about universal behavior screening to keep your community informed.

A central feature of any tiered system of support is accurate detection of which students might need more than Tier 1 efforts have to offer, even when universal components are implemented with adequate levels of treatment integrity. Systematic screening is a proactive way to examine overall levels of risk in a school and determine which students might benefit from Tier 2 or Tier 3 support. Ideally, psychometrically sound, practical screening tools are selected and installed to detect students with externalizing (e.g., aggressive, disruptive, and noncompliant) and internalizing (e.g., painfully shy, socially withdrawn, and anxious) behaviors at the first sign of concern. When a student's screening scores indicate an increased level of risk, screening data can be analyzed with other data (e.g., attendance, fidelity of Tier 1 practices) to make informed decisions about which supports or adjustments to instruction that students might benefit from. It is important to note that this brief focuses on systematic screening designed to inform instruction for students, using screening data with other data collected as part of regular school practices. Screening data are not intended for use to identify students who may benefit from special education services nor are these data intended to exclude students (e.g., this student is screening in as high-risk and will therefore not go on the field trip).

Screening data are intended for use in informing daily instructional practices with a goal of supporting students in learning – and using – behaviors needed to meet school expectations and facilitate positive, productive learning environments. Sharing information about this process can help the community feel confident that systematic screening is a beneficial process that is in place to support all students. In this practice brief, we provide tips that can be considered when your district and school leadership teams plan for sharing information about systematic screening with the community. As part of tips for communicating with your community about systematic screening, we provide your district and school leaders with considerations regarding confidentiality.

## The Whys and Hows of Screening: Frequently Asked Questions for Families

Educational systems continually grow and improve to meet the educational needs of students. Students bring diverse strengths and backgrounds to school, and the assumption is that some students will need more instruction or support than others. **Tiered systems of support** are designed to meet students' educational needs in the areas of academics, behavior, and social and emotional well-being. Using academic and behavior screening tools, educators actively look for students who might need extra help to be successful in school. Screening data are used by teachers for promoting positive, productive, and safe school environments. While there are many approaches to screening, one approach is for teachers to independently complete a screening tool for a student without this in discussion. The tool is used along with other information (e.g., attendance, nurse visits, office discipline referrals) so teachers can efficiently and effectively examine multiple sources of information to prevent learning and behavioral challenges from occurring and then respond effectively when difficulties do arise. Below are often families and community members answers to some common questions about systematic behavior screening.

### What is Systematic Behavior Screening?

#### Answer

Systematic behavior screening is a proactive process often using a valid and reliable screening tool. Educators use screening data to inform decisions about appropriate supports for students of the greatest sign of concern. This process is similar to screening your child for potential hearing and vision concerns.

### What is the purpose of systematic behavior screening?

#### Answer

Screening data are one source of information to help teachers understand how well they are meeting students' educational needs—academically, behaviorally, and socially—through their tiered system of support. Educators use screening data along with other school data (e.g., nurse visits, attendance) to aid in the selection of additional academic, behavioral, or social supports for students.

### How will behavior screening impact my child's instructional time?

#### Answer

Your child's instructional time is not impacted by the use of behavior screening. Teacher completed screenings are based on the teacher's observations with your child. The teacher completes the screening tool independently based on their current knowledge of each student. Student time is not required. Unless your child's school is using a student completed screening tool. In that case, you would receive additional information from your child's school about your child's participation. Your child's school might also be using

# Talk Time: Systematic Screening

- What are some of your initial thoughts on:
  - potential benefits of systematic screening?
  - potential challenges of systematic screening?
- What questions do you have about systematic screening?

00:00

A woman with blonde hair, wearing a black dress and a light green vest, stands on the left side of the whiteboard, pointing her right index finger towards the text. A man with short brown hair, wearing a black polo shirt and khaki pants, stands on the right side of the whiteboard, also pointing his right index finger towards the text. The whiteboard is mounted on a light-colored wall and has a silver frame. At the bottom right of the whiteboard, there is a small tray containing a green marker, a white eraser, and a black object.

### Abstract

Universal behavior screening is used in schools worldwide to detect students with and at risk for behavioral challenges. A plethora of instruments is available for this purpose, though little metascience has been conducted to review and synthesize methods used to study these instruments in educational settings, nor is there a comprehensive list of instruments to support educators in selecting an appropriate tool. We conducted this review to provide a rigorous—and accessible—overview of the research base for universal behavior screening instruments to facilitate educators' decision-making process when selecting a systematic screening tool for the students they serve and identify areas of further refinement for the research community. This scoping review includes an extensive list of behavior screening instruments, an examination of how these tools have been studied, and areas for future research. We identified 56 behavior screening instruments. The most common psychometric analyses included coefficient alpha for internal consistency, correlations between theoretically related variables, and confirmatory factor analysis. We discuss other methods currently employed as well as methods and complexities for consideration in future research.

# Behavioral

## Area I: Academics Responsibilities

### Faculty and Staff:

- Teach core programs according to district and state standards with integrity:
- Use teacher-delivered, low-intensity strategies to support students' active engagement

## Area II: Behavior Responsibilities

### Faculty and Staff:

Implement Positive Behavioral Interventions and Supports (PBIS) with integrity.

- Teach all setting Expectations within the first week of school and reteach Expectations (monthly).
- Display and model school-wide expectations in classrooms and other key settings.
- Provide behavior specific praise and intermittently pair praise with delivering the schoolwide ticket to students who display school-wide expectations throughout school settings.
- Implement the reactive plan with integrity.

## Area III: Social Responsibilities

### Faculty and Staff:

Teach schoolwide social skills/ character education curricula with integrity:

- Teach daily Second Step ® lessons (link to grade level instructional schedules)
- Seek ways to engage parents as partners in the school program

# 6-Step Instructional Approach for Responding to Challenging Behavior

In a Ci3T model, Tier 1 supports include a six-step instructional approach for responding respectfully to minor and major challenging behaviors, based on lessons learned from supporting students with acting out behavior.

**\* How we *first* respond is likely to influence whether the student's behavior escalates toward a crisis, or de-escalates toward a calm state conducive to learning!**

References: Colvin, G. (2004). Managing the cycle of serious acting out behavior. Behavior Associates  
Colvin, G., & Scott, T. M. (2015). Managing the cycle of acting-out behavior in the classroom (2nd ed.). Corwin Press.

# Embedding Low-Intensity Supports in Daily Instruction

# Exploring Resources:

## Embedding and Integrating Ci3T Domains Into Daily Instruction

Date: 2018-10-16		Class: 6 <sup>th</sup> grade ELA	Unit: grammar	
Integrated Lesson Plan				
Topic: Pronoun Case			Assess/Supervision	Feedback/Specific Praise
Standards: 6.L.CS.1. Demonstrate command of the conventions of standard English grammar and usage. When writing or speaking, use pronouns (pronoun case, intensive pronouns, pronoun- antecedent agreement) effectively.			High P/Request Sequence	Instrumental Choice
Core Lesson Elements		Learnable Access and Inclusion	Instrumental Feedback	Opportunities to Respond
Academic Objectives		Tier 1 (for all)	Differentiated Objectives	
Express yourself clearly; take turns talking with and listening to peers		Given a clear sentence, select and place a pronoun or different cases for accurate sentence construction. Ask for help when needed (in addition to Tier 1 objectives)		
Behavioral Objectives				
Date: 2018-10-16		Class: 6 <sup>th</sup> grade ELA	Unit: grammar	
Write 2-3 sentences and underline the pronouns used. You may use a dry erase marker on your desk or write with pencil on a piece of paper.		Write down 2 sentences in Spanish and identify the pronouns you use. Translate one of the sentences to English and identify pronoun changes (work with a peer to check).	X	X
Writing Activity (Independent)		Sentence strips provided; student will circle or highlight pronouns.		
Materials & Tools		Instructional Choice: Choose a dry erase marker on student desk or write with pencil on a piece of paper.		
Introduction:		Ask students to identify subjects and objects in sentences from a book they are reading; vary sentences and prevent overusing names.	How do Spanish pronouns end when talking about a boy or girl? Connect to English pronouns.	X X X
Practice sequence:		1. PowerPoint 2. Catch a ball with pronoun written on it and make a sentence using the pronoun by your right partner (1/1R) 3. Write a paragraph about a topic of your choice. Underline all pronouns that you use.	Introducing Additional Instruction: Provide instructions; feedback (covert, clearly and explicit) during the ball game. Work with students individually during paragraph writing.	X X X X X X
Sharing Activity:		1. Assess students' comprehension by checking accuracy of independent practice. 2. Review by each type of pronouns and examples from each so that each student remembers it just now. 3. Debatable based on assessment of independent practices if additional practice is needed or if fluency practice can be added to lesson on subject noun agreement.	Differentiated on (non-writing) practice. Student Check out: Writers conferences; talk with student individually about content level using pronouns in English. As with all students, check accuracy of independent practice.	X X X X

# The ABCs of Behavior:

## A Focus On the Before and After

The ABCs of behavior, also known as the three-term contingency, can help us analyze antecedents, behavior, and consequences to explain, predict, and shape future behavior.

### Antecedent

Antecedents are events that come before the behavior occurs, or things that set the stage for behavior to occur.

What happened before the behavior?

### Behavior

Behavior refers to anything an individual does that is observable, measurable, and repeatable. Consider acquisition (can't do) and performance (won't do) behavioral needs.

What did the student do?

### Consequence

Consequences are anything that comes following a behavior. They include events, situations, people's behavior, or things.

What happened after the behavior occurred?

### Function

*Why did the behavior happen?*

- Identifies the reason why the behavior occurred, or why it is effective.
- There are different reasons individuals do things (to access or avoid things).

Collect and use data to inform decisions

**\* All learning happens through consequences!**

- **Antecedents** influence behavior and affect our future actions.
- **Consequences** determine the likelihood of engaging in behavior in the future.

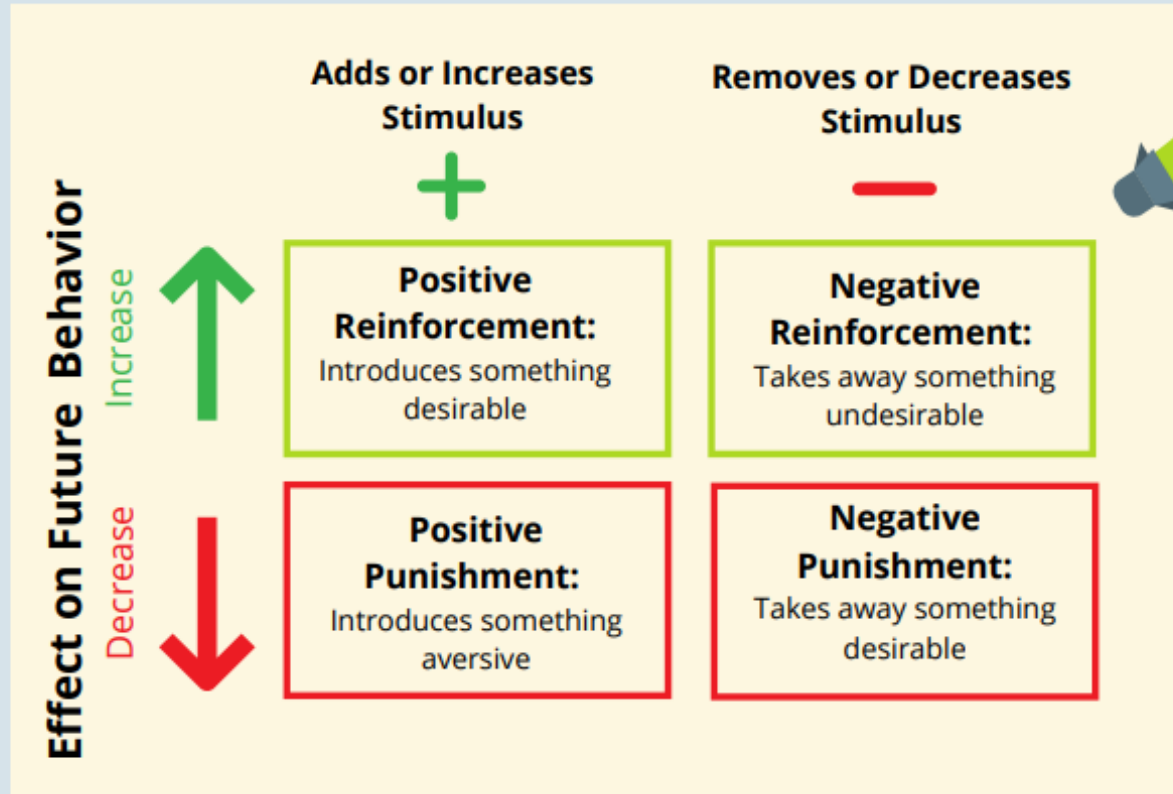

# Understanding Consequences: The Power of Reinforcement

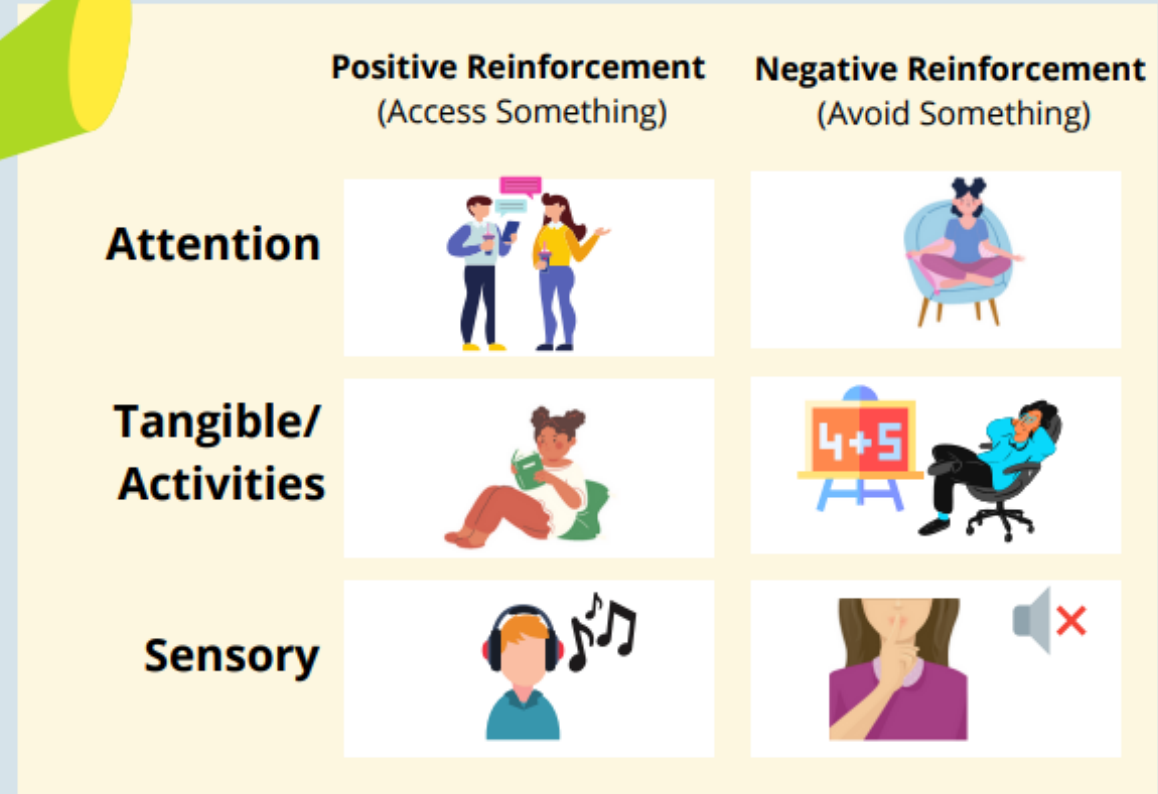

Consequences are simply what occurs after the behavior. They do not have to be good or bad. Some consequences of behavior are natural, and others can be planned to support more positive behavior. We can use reinforcement intentionally as a consequence to increase the future probability of desirable behavior occurring. It is important to first identify what types of things students find reinforcing, depending on the function of their behavior, or why it happens and why it continues to occur.

## Consequences

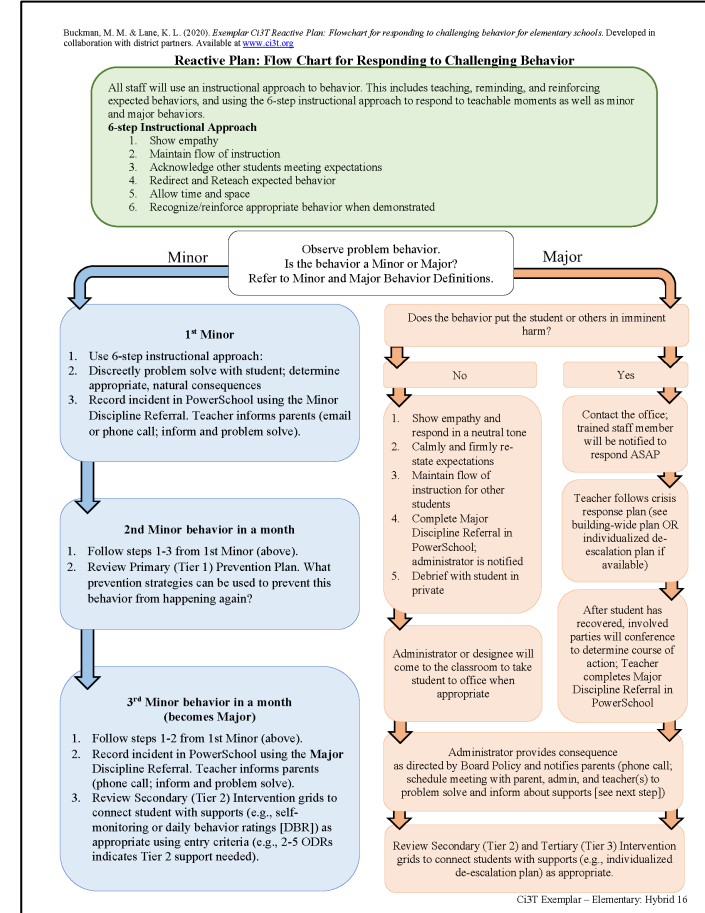

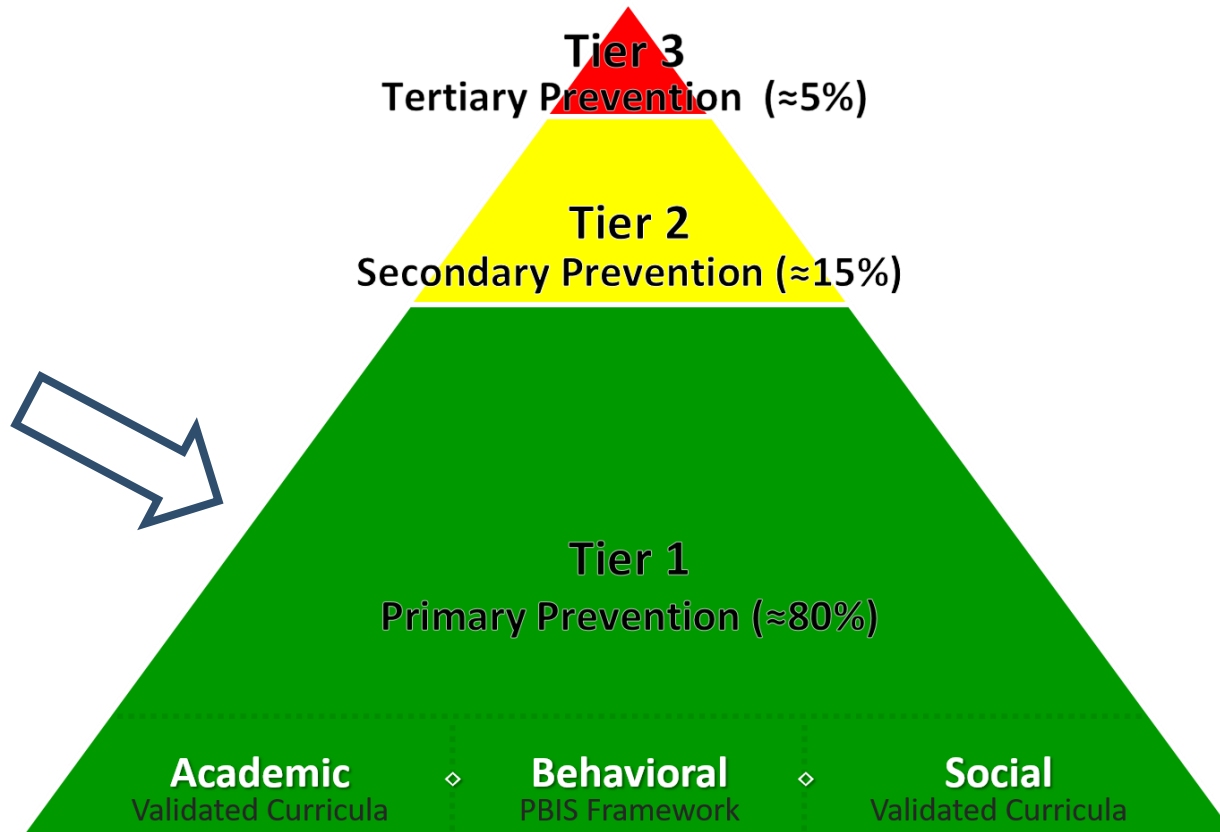

## Reinforcement

**\* Remember all learning happens through consequences!**

Learning Environments

Buckman, M. M. & Lane, K. L. (2020). *Exemplar Ci3T Reactive Plan: Flowchart for responding to challenging behavior for elementary schools*. Developed in collaboration with district partners. Available at [www.ci3t.org](http://www.ci3t.org)

## Reactive Plan: Flow Chart for Responding to Challenging Behavior

All staff will use an instructional approach to behavior. This includes teaching, reminding, and reinforcing expected behaviors, and using the 6-step instructional approach to respond to teachable moments as well as minor and major behaviors.

### 6-step Instructional Approach

1. Show empathy
2. Maintain flow of instruction
3. Acknowledge other students meeting expectations
4. Redirect and Reteach expected behavior
5. Allow time and space
6. Recognize/reinforce appropriate behavior when demonstrated

# **Describing a 6-step Instructional Approach for Responding to Challenging Behavior**

# 6-Step Instructional Approach for Responding to Challenging Behavior

In a Ci3T model, Tier 1 supports include a six-step instructional approach for responding respectfully to minor and major challenging behaviors, based on lessons learned from supporting students with acting out behavior.

**\* How we *first* respond is likely to influence whether the student's behavior escalates toward a crisis, or de-escalates toward a calm state conducive to learning!**

# How Do I Implement a 6-Step Instructional Approach at My School?

**Step 1**

Show empathy

**Step 2**

Maintain the flow of instruction

**Step 3**

Acknowledge other students meeting expectations

### Abstract

Project Persevere examined teacher efficacy and burnout within Comprehensive, Integrated, Three-tiered (Ci3T) models of prevention, as implemented in two middle schools in a southern state. Participating schools completed a year-long training series to design their Ci3T plans and were in their first year of implementation as part of regular school practices. Participating teachers completed the Teachers' Sense of Efficacy Scale 24-item Long Form (TSES; Tschannen-Moran & Woolfolk Hoy, 2001) and the Maslach Burnout Inventory (MBI; Maslach, Jackson, & Leiter, 1996) at the end of the school year. Teacher self-ratings were examined to describe how teachers in schools with prevention models were faring. Three sets of variables were examined: (a) teacher efficacy and burnout, (b) treatment integrity and social validity ratings of the Ci3T model of prevention, and (c) student behavioral risk. Findings indicated both schools implemented the Ci3T model with high integrity and teachers rated their plans with high social validity. Limitations and future directions are provided.

**KEYWORDS:** Teacher Burnout, Teacher Efficacy, Three-Tiered Models Of Prevention, Three-Tiered Models Of Prevention: Teacher Efficacy And Burnout

School systems and educators are charged with creating positive, safe, and orderly learning environments and offering instructional experiences to enable all students to meet rigorous educational

and Nathan Allen Lane, BS<sup>6</sup>

### Abstract

In this article, we examined educators' efficacy and burnout within Comprehensive, Integrated, Three-tiered (Ci3T) models of prevention, as implemented in 14 elementary schools in a Midwestern state. Participating schools completed a year-long training series to design their Ci3T plans and were in their second year of implementation as part of a districtwide initiative. We examined educators' year-end self-ratings to describe how teachers in schools with prevention models were faring, exploring three sets of variables (a) self-reported Ci3T treatment integrity, (b) social validity ratings of their Ci3T model of prevention, and (c) educators' sense of efficacy and burnout. Results indicated educators experienced emotional exhaustion; however, depersonalization and personal accomplishment scores revealed positive and large magnitude differences compared with a national sample. Moreover, educators reported higher levels of efficacy related to instructional strategies and classroom management than a national sample. Higher self-reported levels of Ci3T treatment integrity were associated with increased levels of efficacy related to student engagement. We discuss limitations and future directions.

### Keywords

professional practice/standards and ethics, school(s)

Contemporary educators face many pressures including increased accountability for student achievement (Ryan et al., 2017), decreased funding (Lambert & McCarthy, 2006), and challenging working conditions (Goldring et al., 2014). Perhaps most substantial is the charge to provide rigorous learning experiences to students exhibiting a wide range of academic, behavioral, and social-emotional needs. To meet this challenge, schools have begun to adopt tiered prevention models, such as School-Wide Positive Behavior Interventions and Supports (SWPBIS; Sugai & Horner, 2002), Response to Intervention (RTI; Fuchs & Fuchs, 2006), Multi-Tiered System of Supports (MTSS), Interconnected Systems Framework (ISF; Barrett et al., 2013), and Comprehensive, Integrated, Three-tiered models of prevention (Ci3T; Lane, Oakes, & Menzies, 2014). These models provide a framework in which educators can proactively employ evidence-based practices to promote the learning of all students, identify students who exhibit additional needs, and provide targeted interventions

according to students' individual needs (Lane, Oakes, & Menzies, 2014; Sugai et al., 2000).

Tiered systems may hold promise for supporting educators by offering a consistent, clear, and collaborative structure for general and special education communities to

### Abstract

We examined educators' sense of efficacy and burnout within comprehensive, integrated, three-tiered (Ci3T) models of prevention implemented in four middle and two high schools. At the time of this study, schools had completed 2 years of implementing Ci3T models as part of a larger district initiative. We examined how educators were faring with a specific interest in their well-being. We explored four sets of educator-reported variables: Ci3T treatment integrity, Ci3T social validity, sense of efficacy, and feelings related to burnout. Results indicated educators experienced emotional exhaustion nearly identical to a national sample; however, depersonalization and personal accomplishment scores revealed positive and moderate-to-large-magnitude differences compared with a national sample. Moreover, educators reported higher levels of efficacy related to instructional strategies and classroom management than a national sample. Higher self-reported levels of Ci3T treatment integrity were associated with increased levels of efficacy related to the efficacy subscales of Student Engagement, Instructional Strategies, and Classroom Management. We conclude with a discussion of limitations and directions for future inquiry.

### Keywords

Ci3T, tiered systems, self-efficacy, burnout

Middle and high school teachers experience a range of challenging job demands including difficult working conditions, role ambiguity, and frequent leadership turnover (Burkhauser et al., 2012). Navigating their professional environment can also affect their ability to meet their most important charge—meeting the educational needs of a diverse range of students, including individualizing academic content, managing behavior, and supporting social-emotional development (Skaalvik & Skaalvik, 2007). Tiered systems can assist educators by offering clearly defined roles, school-wide policies and procedures, and a collaborative structure for general and special educators to collectively support students' learning and well-being as well as educators' well-being (Kyriacou, 2001; Lane, Menzies, et al., 2013). To address these challenges, schools have adopted tiered systems such as Positive Behavior Interventions and Supports (PBIS; Sugai & Horner, 2002), Response to Intervention (RTI; Fuchs et al., 2010), Multi-Tiered System of Supports (MTSS; Johnson & Mellard, 2014), Interconnected Systems Framework (ISF; Barrett et al., 2013), and comprehensive, integrated, three-tiered

models (Ci3T; Lane et al., 2019). These models offer a school-wide structure to provide educators with clarity of roles, prioritize evidence-based practices to promote all students' learning, use data to proactively identify students who exhibit additional needs, and inform targeted interventions to address identified needs (Sugai & Horner, 2002).

Evidence suggests implementation of tiered systems at the elementary level is associated with improvements in

## Ci3T Project EMPOWER + Professional Learning Series 2025-2026

**Presenters:** Kathleen Lynne Lane, Ph.D., BCBA-D, CF-L2, Mark M. Buckman, Ph.D.,  
David James Royer, Ph.D., BCBA, & Ci3T Research Team

**Audience:** This professional learning series is offered at no charge to preK-12 educators, administrators, related service providers, paraprofessionals, and families interested in learning more about proactive, systematic methods of looking for and assisting students who might require additional assistance to experience success in school. Each session provides stand-alone information to build knowledge, skills, and confidence to implement effective practices to support students' multiple academic, behavioral, and social and emotional well-being learning needs in the context of a Comprehensive, Integrated, Three-tiered (Ci3T) Model of Prevention.

[Register here](#) or scan the QR code →

In addition to registering with the Ci3T Research Team, check with your district's professional development management system to see if you can also register there to earn professional learning credits.

**Expectations:** Each online 2-hr session includes interactive whole-group instruction and small-group breakout discussion time. Please come prepared to engage with presenters and fellow educators via Zoom chat and working audio/video technology (e.g., able to have your webcam on, type in Zoom chat, join small-group discussions with microphone).

**BCBAs:** This professional learning series also covers behavior analytic content to meet requirements for Board Certified Behavior Analysts (BCBAs) seeking continuing education units (CEUs). Attendees must be present the entire 2-hr and meet expectations above to earn two (2) learning CEUs per session, at no cost.

**Location:** Zoom **Cost:** Free **Learn more information about Ci3T:** [ci3t.org](https://ci3t.org)

Date	Session Description
<b>September 24, 2025</b> 2:30 – 4:30 PM (pacific) 4:30 – 6:30 PM (central) 5:30 – 7:30 PM (eastern)	<b>Starting Strong: Effective Tier 1 Practices for Educators</b> We focus on Tier 1 strategies to start the year strong, including how to provide integrated instruction across academic, behavior (positive behavioral interventions and supports), and social and emotional well-being learning domains. We review procedures for teaching, reinforcing, and monitoring at Tier 1, using input from faculty and staff including treatment integrity (how well the plan is in place) and social validity (views about the plan's goals, procedures, and outcomes). Learn how to begin the year headed toward sustainable, high-fidelity implementation of your schoolwide plan!
<b>October 08, 2025</b> 2:30 – 4:30 PM (pacific) 4:30 – 6:30 PM (central) 5:30 – 7:30 PM (eastern)	<b>From Data to Action: Using Systematic Screening to Inform Instruction</b> We describe how systematic academic and behavior screening occurs within tiered models of prevention to inform instruction for students and professional learning for adults. Learn how to use systematic screening data alongside other data collected as part of regular school practices to (a) inform instruction at Tier 1, (b) empower teachers with low-intensity strategies (e.g., instructional choice), and (c) connect students to validated Tier 2 (e.g., self-monitoring) and Tier 3 (e.g., functional assessment-based interventions) supports.
<b>November 18, 2025</b> 2:30 – 4:30 PM (pacific) 4:30 – 6:30 PM (central) 5:30 – 7:30 PM (eastern)	<b>Ci3T In Action: Integrated Lesson Planning for Enhanced Instruction</b> We introduce a practical tool—the Ci3T Integrated Lesson Plan—designed to support teachers in setting the stage for students to be productively engaged across academic, behavior, and social domains. We will move from planning to practice,

# Ci3T Trainers and Coaches Calls

## Ci3T Trainers and Coaches Calls

The purpose of our coaching calls is to provide ongoing support for Ci3T District Leaders, Ci3T Trainers, Ci3T Coaches, and other individuals supporting the design and implementation of Comprehensive, Integrated, Three-tiered (Ci3T) Models of Prevention.

Offered remotely via Zoom

**4:00-5:00 PM Central**

Please email Stacie Williams

**Abstract**  
There are many integrated Multi-tiered Systems of Support (MTSS), which we refer to as integrated-tiered systems. These systems hold benefits for students with disabilities, as such systems have the potential to facilitate inclusion and focus the collective expertise of educators committed to meeting students' multiple needs. The Comprehensive, Integrated Three-Tiered (CI3T) prevention model was designed to meet student's academic, behavioral, and social and emotional well-being needs within one integrated system. Using lessons learned over decades of research, we present a step-by-step approach to building educators' capacity to implement integrated tiered systems through data-informed professional learning. We illustrate how school leaders can use this approach to onboard new faculty, plan coordinated ongoing professional learning for all educators, and facilitate the use of data to inform instruction—all of which are intertwined through the design, implementation, and evaluation of CI3T models.

integrated tiered systems, CI3T, data-informed professional learning

*Ms. Rabadi is very excited about starting her new position at Lincoln Elementary School. She and her family were recently transferred to a military base in Kansas. Ms. Rabadi interviewed for a fifth-grade general education teaching position at a local district that prioritized inclusive programming for students with disabilities. The job position description said it was a Comprehensive, Integrated Three-tiered (CI3T) model of prevention district with all 21 schools implementing CI3T. She followed the links to the district and school websites, where she read more about CI3T, which she learned was a type of integrated tiered system. Her previous district implemented schoolwide positive behavioral interventions and supports (PBIS), so she was familiar with tiered systems and was interested in learning more about a comprehensive, integrated framework.*

*behavioral, and social and emotional learning domains. Ms. Rabadi was relieved that the CI3T Implementation Manual clearly listed everyone's responsibilities. She also felt she had a good sense of how to support students with diverse learning needs using available Tier 2 and Tier 3 interventions. The interview went well, and she was offered the position, which*

*Before Ms. Rabadi's interview at Lincoln Elementary School, the principal, Mr. MacMillan, sent her a copy of the school's CI3T Implementation Manual. He asked her to read through the entire plan and come to the interview with any questions about faculty and staff roles and responsibilities in academic,*

PRACTICE GUIDE

Teacher-Delivered Behavioral Interventions in Grades K-5

Released: December 2024

Introduction document (160 KB)

Summary document (479 KB)

Full Guide (5.7 MB)

Recommendations

Details

Panel

This practice guide provides teachers with seven recommendations for implementing low-intensity behavioral interventions in grade K-5 classrooms to support students in demonstrating expected behaviors in the classroom so that students and their classmates can engage in learning.

1	Co-establish, model, and teach clear expectations for student behavior consistent with schoolwide expectations.	STRONG EVIDENCE	<div>TIER 1</div> <div>STRONG</div>
Show More			
2	Remind students to engage in expected behaviors.	STRONG EVIDENCE	<div>TIER 1</div> <div>STRONG</div>
Show More			
3	Acknowledge students for demonstrating expected behaviors through positive attention, praise, and rewards.	STRONG EVIDENCE	<div>TIER 1</div> <div>STRONG</div>
Show More			
4	Offer instructional choices to students to increase engagement and agency.	MODERATE EVIDENCE	<div>TIER 2</div> <div>MODERATE</div>
Show More			
5	Provide students frequent and varying opportunities to respond to and engage in activities.	MODERATE EVIDENCE	<div>TIER 2</div> <div>MODERATE</div>
