6-Step Instructional Approach for Responding to Challenging Behavior

40

A Focus on: Responding to Challenging Behavior

41

Reactive Plan: Flow Chart for Responding to Challenging Behavior

All staff will use an instructional approach to behavior. This includes teaching, reminding, and reinforcing expected behaviors, and using the 6-step instructional approach to respond to teachable moments as well as minor and major behaviors.

6-step Instructional Approach

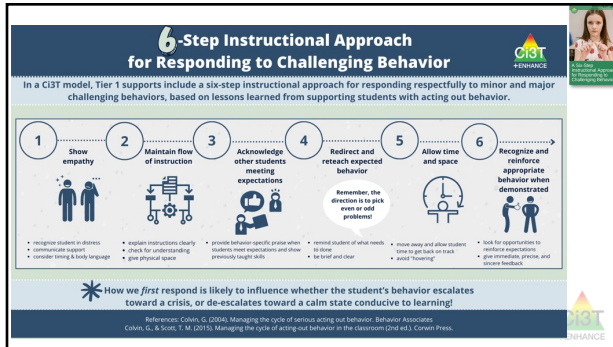

1. Show empathy
2. Maintain flow of instruction
3. Acknowledge other students meeting expectations
4. Redirect and detach expected behavior
5. Allow time and space
6. Recognize/reinforce appropriate behavior when demonstrated

Flowchart:

```

graph TD
    Start([Observe problem behavior.  
Is the behavior a Minor or Major?  
Refer to Minor and Major Behavior Definitions.]) -- Minor --> MinorBox[1st Minor  
1. Use 6-step instructional approach;  
2. Discreetly problem solve with student; determine appropriate, natural consequences  
3. Record incident in PowerSchool using the Minor Discipline Referral. Teacher informs parents (email or phone call; inform and problem solve).]
    Start -- Major --> Harm{Does the behavior put the student or others in imminent harm?}
    Harm -- No --> NoBox[1. Show empathy and respond in a neutral tone  
2. Calmly and firmly re-state expectations]
    Harm -- Yes --> YesBox[Contact the office, trained staff member will be notified to respond ASAP]

Active Supervision

Intentional, specific, and overt behaviors educators use such as:

- Establishing expectations
- Frequently scanning the context
- Engaging in positive interactions (verbal and nonverbal precorrections and prompts, listening and offering feedback as appropriate)
- Reinforcing desired behavior
- Correction or redirection (when needed)

In the classroom, you would notice the teacher is scanning the classroom, moving between students or groups, praising on-task behavior and correct work, providing feedback to fine tune understanding, using precorrection and prompts to prevent anticipating issues and minimize any potential challenges.

Precorrection

Behavior-Specific Praise

Statements that acknowledge and clearly state what desirable behavior has been performed.

- "Jesse, I see you showing respect for your partner by listening to their ideas"
- "Thank you for showing responsibility by putting the science materials away"

Behavior-specific praise can be used to acknowledge expected behavior of an individual student or multiple students engaging in academic and non-academic tasks.

Opportunities to Respond

Precorrection

High-P Request Sequence

Requesting behaviors that a student is likely to respond to, and providing reinforcement for appropriate responding. Three to five high probability (high-p) requests are quickly given followed with praise for compliance and a low-p request (desired behavior). This strategy takes advantage of behavioral momentum, where we increase compliance and reinforcement to create momentum for compliance to another behavior.

High-p Examples:

- "Take out your pencil."
- "Get out a sheet of paper."
- "Write your name on your paper."

Low-p Examples:

- "Begin your independent work."

Instructional Choice

Offering students opportunities to make choices throughout the instructional day.

Teachers offer students two or more options, allow each student to independently make their choice, and the student is provided with the selected option.

Precorrection

Instructional Feedback

Providing specific information to students about their performance, with the purpose of clarifying misinformation, confirming understandings, or restructuring current schemas.

Educators use this strategy when students have a foundational understanding of the content or concepts and are working towards proficiency and fluency. Without foundational understanding, instruction is needed instead of feedback. Educators monitor student data to decide when feedback should be used or when instruction is needed.

Opportunities to Respond

Frequent opportunities within a set time period of time for students to respond to teacher questions to practice skills or build fluency.

- Best done with material or concepts already taught and for which students have a basic understanding.
- Three or more opportunities to respond per minute is the goal.

In the classroom, you would notice the teacher is providing high rates of opportunities to respond through combinations of choral responding, thumbs up/down, response cards, personal white boards, clickers, or other methods.

Proactively reminding students of expectations *before* entering an environment or beginning an activity.

- A teacher reminds students of expectations for working in a collaborative group before beginning the activity. Then the teacher reinforces students meeting expectations with behavior-specific praise.
- A cafeteria monitor greets students as they enter the cafeteria and reminds them of the expectations for staying safe in the cafeteria, such as keeping their mask on while in line and in the shared space, standing on the floor markers spaced six feet apart. Then those serving students lunch can provide behavior-specific praise when students demonstrate the expectations.

Selecting an Intervention

69

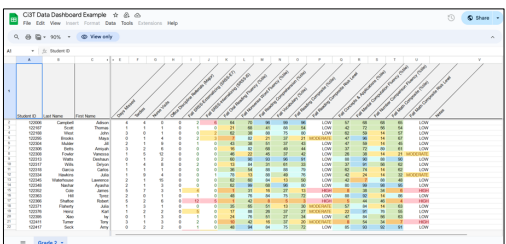

Selecting an Intervention

- Collaborate with families, colleagues, and the student to review available options
- Consider what you know about the student (e.g., strengths, preferences, pre-requisite skills)
- Consider possible function of the behavior
 - Check-In Check Out is may be more effective for students who find accessing adult attention reinforcing
- Consider your own strengths, support available (e.g., coach, professional learning), and feasibility of available options
- Adjust as needed based on pre-intervention social validity
